2013 – 2016 **"University of 1 Decembrie 1918 "** – Alba Iulia Romania
- Bachelor's degree - Computer Science

2009 – 2013 **"Horea, Closca si Crisan"** National College, Romania
- Romanian Baccalaureate Degree

Skills

Programming Languages*:* JavaScript Typescript Python Java

Web development: HTML CSS Web Components Redux React

Testing: Unit testing E2E Testing

Front-end Frameworks: Angular PolymerJS React JS angular.js

Version control system*:* Git TFS

Cloud computing: Azure

Databases: SQL Mongo

Operating System: MacOS Linux Windows

Annex

Lion Web Components

Lion web components is a set of highly performant, accessible and flexible Web Components. They provide an un-opinionated, white label layer that can be extended to your own layer of components.

My contribution:
- **fix accessibility issues on component level**
- **add new features to calendar component (Month navigation)**
- **finding and reporting bugs**

ING {Dev} School - CSS GRID

ING{Dev}School is an intensive hands-on training program on your favorite technology, fully sponsored by ING. It was launched in the autumn of 2015 and now it has reached the 17th edition.

My contribution:
- **Present and develop one presentation using slides.com (link to presentation).**
- **Develop hands-on prototype for participants to interact with. (link to prototype)**

Internal squad presentations

Develop and present presentations for my squad members.

My contribution:

- **Present and develop Flexbox presentation ([link to presentation](#)).**
- **Present and develop React Fundamentals presentation. ([link to presentation](#))**
